

Registration Ref.	#016 (14/4/2004)
Cultivar Name	<i>P.</i> 'Red Dwarf'
Originator	Simon Schulz (Germany)
Parentage	<i>P. cuprea</i> (♀) × ? (♂)
Description	Vine glabrous, compact; flowers 6cm in diameter, copper-red, open for 2-3 days; petals shorter and narrower than sepals; filaments stout red; leaves simple 6.5 x 2-3cm; peduncles 2.5-3cm; petiole 1-2cm; insignificant bracts and stipules; no petiole glands. This cultivar may not be a hybrid, but a selection of <i>P. cuprea</i> with broader than normal petals/sepals.
