

# *Passiflora* 'Cardozo'

Registration Number: 193

Registration Date: June 20, 2014

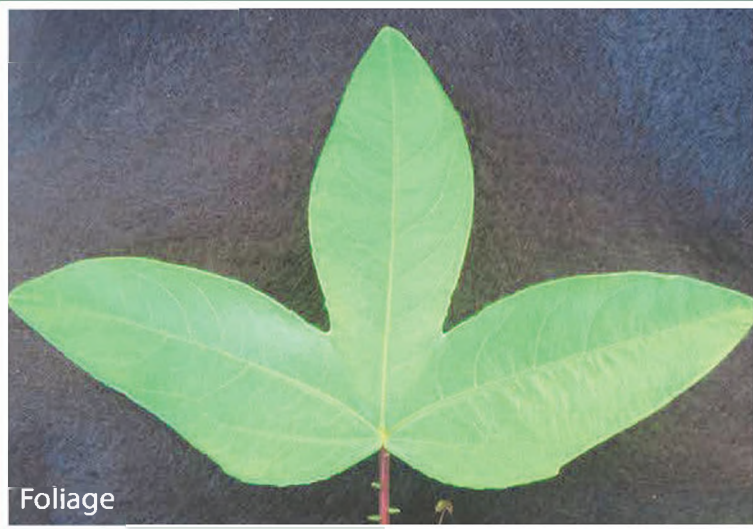

Grower of original plant, Submitted by: Shawn Mattison

Parentage: *P.* 'Panda' x *P. loefgrenii* '1poranga'

Sepal color: Light lavender  
Petal color: Light lavender  
Flower diameter: 10.0cm  
Floral tube length: N/A  
Flower shape: Reflexed  
Flower position: Oblique  
Stigma color: Green  
Styles color: Green with purple  
Position of androgynophore: Center  
Awns: Long and straight  
Quantity of pollen: Scant  
Color of pollen: Yellow  
Blooming period: Spring - Autumn

Duration of bloom: 1.5 day  
Flower opens: Late-morning  
Flower closes: Late-afternoon  
Number of coronal series inner and outer: N/A  
Filament morphology: Straight  
Color of outer coronal series: Red-purple at center, followed by a white band, and then a blue-purple outer band, white tips.  
Color of inner coronal series: Red-purple  
Lobation: Variable  
Foliage shape: Lobate  
Foliage dimensions: 10 x 15cm  
Leaf margin: Serrate

Foliage

Adaxial texture: Waxy  
 Abaxial texture: Flat  
 Adaxial coloration: Dark green  
 Abaxial coloration: Lighter green with red veins  
 Quantity of petiole glands: Multiple pairs  
 Petiole gland shape: Filiform  
 Petiole gland color: Green to red  
 Petiole gland position: Mid  
 Vine color: Green to red  
 Vine shape: Round  
 Vine texture: Smooth  
 Fruit shape: Ellipsoid  
 Fruit color: Green to yellow  
 Fruit size: 6 x 8cm  
 Number of seeds: Many  
 Color of arils: Yellow  
 Flavor of arils: Terrible, like *P. loefgrenii*  
 Peduncle length: Up to 20cm  
 Peduncle position: Intermediate

Flower

Stipules

Bract size: 1.5 x 1cm  
 Bract shape: Ovate  
 Bract color: Green  
 Extrofloral nectaries: No  
 Description of stipules: Setaceous 3 x 1.5cm  
 Vine vigor: Excellent  
 Floriferousness: Excellent  
 Light requirements: N/A  
 Humidity requirements: Not particular

Max temp: N/A  
 Min temp for leaf hardiness: At least -4C  
 Min temp for root hardiness: At least -4C  
 Additional information: Leaves are mostly 3-lobed, with occasional 4 or 5-lobed leaves.  
 Hybrid is named for: The surname of a kind, generous, and hard-working family in rural Paraguay who took care of the hybridizer for 2 months when he was a teenager.
