

Passiflora 'Tango'

Registration Number: 195

Registration Date: June 20, 2014

Grower of original plant, Submitted by: Shawn Mattison

Parentage: *P.* 'Star of Surbiton' x *P. loefgrenii* 'Iporanga'

Sepal color: Deep pink
Petal color: Light pink
Flower diameter: 12.0cm
Floral tube length:
Flower shape: Flat
Flower position: Upright
Stigma color: Green
Styles color: Mostly deep puple with purple mottling over green background at tips.
Position of androgynophore: Center
Awns: Moderate
Quantity of pollen: None
Scent: None

Blooming period: Spring - Autumn
Duration of bloom: 1.5 day
Flower opens: Mid-morning
Flower closes: Evening
Number of coronal series inner and outer: 3
Filament morphology: Straight
Color of outer coronal series: Purple at center, white central band, bright blue tips
Color of inner coronal series: Purple
Lobation: 3
Foliage shape: Lobate
Foliage dimensions: Up to 6 x 9cm
Leaf margin: Entire

Foliage

Adaxial texture: Flat
 Abaxial texture: Flat
 Adaxial coloration: Green
 Abaxial coloration: light Green
 Quantity of petiole glands: Scattered
 Petiole gland shape: Filiform
 Petiole gland color: Red
 Petiole gland position: Mid and distal
 Vine color: Red towards sun, green away from sun
 Vine shape: Round
 Vine texture: Smooth
 Fruit shape: Ellipsoid
 Fruit color: Green to yellow when ripe
 Fruit size: Up to 3 x 8cm
 Number of seeds: Few
 Color of arils: Yellow
 Flavor of arils: Terrible, like *P. loefgrenii*
 Peduncle length: 8-12cm
 Peduncle position: Intermediate

Flower

Bract size: 2 x 2.5cm
 Bract shape: Inverted heart
 Bract color: Red and green
 Extrofloral nectaries: No
 Description of stipules: Setaceous and 2.5 x 1 cm
 Vine vigor: Excellent
 Floriferousness: Excellent

Light requirements:
 Humidity requirements:
 Max temp: copes with 30+ C
 Min temp for leaf hardiness: At least -2C
 Min temp for root hardiness: At least -4C
 Hybrid is named for: The Argentine dance
