

Passiflora 'Stella de Pézilla'

Registration Number: 217

Registration Date: September 25, 2014

Grower of original plant, Submitted by: Sébastien Sabureau

Parentage: *P.* 'Murac' x *P. galbana*

Flower

Sepal color: White
Petal color: White
Flower diameter: 7.5cm
Floral tube length: N/A
Flower shape: Recurved
Flower position: Horizontal
Stigma color: White
Styles color: Green
Position of androgynophore: Leaning
Awns: N/A
Quantity of pollen: Copious
Color of pollen: Orange
Scent: None

Blooming Period: Spring - Autumn
Duration of bloom: 1 day
Flower opens: Late afternoon
Flower closes: Mid morning
Number of coronal series inner and outer: 3
Filament morphology: Straight
Color of outer coronal series: White
Color of inner coronal series: White
Lobation: 1
Foliage shape: Lanceolate
Foliage dimensions: 7cm
Leaf margin: Ciliate

Bracts

Adaxial texture: Flat
 Abaxial texture: Flat
 Adaxial coloration: Green
 Abaxial coloration: Green
 Quantity of petiole glands: Single pair
 Petiole gland shape: Cylindrical
 Petiole gland color: Green with dark red base
 Petiole gland position: Mid
 Vine color: Dark red
 Vine shape: Round
 Vine texture: Smooth
 Fruit shape: Ovoid
 Fruit color: Yellow
 Fruit size: 8cm
 Number of seeds: Many
 Color of arils: Yellow
 Flavor of arils: Good
 Peduncle length: 5.6cm
 Peduncle position: Hanging

Flower

Bract size: 1.9cm
 Bract shape: Lanceolate
 Bract color: Green and red
 Extrofloral nectaries: None
 Description of stipules: 1.8 cm green and red
 Vine vigor: Excellent
 Floriferousness: Excellent

Humidity requirements: Moderate
 Light requirements: Partial Sun
 Max temp: 45c
 Min temp for leaf hardiness: Unknown
 Min temp for root hardiness: Unknown
 Additional information: Abaxial side of sepals is rose to red
 Hybrid is named for: For Estelle
