

# *Passiflora* 'Diva'

Registration Number: 221

Registration Date: May 23, 2015

Grower of original plant, Submitted by: David Costen

Parentage: *P.* 'Cupid's Blush' (registered 2005 - #047) x *P. caerulea*?

Sepal color: White

Petal color: White-pale pink depending on conditions.

Flower diameter: 15cm

Floral tube length: N/A

Flower shape: Flat

Flower position: Oblique

Stigma color: N/A

Styles color: N/A

Position of androgynophore: Center

Awns: Up to 17mm curved inwards.

Quantity of pollen: Scant

Color of pollen: Yellow

Scent: N/A

Blooming Period: Year around

Duration of bloom: 3 days

Flower opens: Variable

Flower closes: Variable

Number of coronal series inner and outer: 5

Filament morphology: Curved

Color of outer coronal series: Reddish-purple at base; white mid-section; mottled purplish at tips.

Color of inner coronal series: Purplish-red to dull red

Lobation: Variable

Foliage shape: Other

Foliage dimensions: Up to 21 x 23 cm

Leaf margin: Entire

Adaxial texture: Waxy

Foliage

Abaxial texture: Waxy  
 Adaxial coloration: Dark green  
 Abaxial coloration: Pale green  
 Quantity of petiole glands: Multiple pairs  
 Petiole gland shape: Subsessile  
 Petiole gland color: Red if grown in sun otherwise olive green.  
 Petiole gland position: N/A  
 Vine color: Dark green to pale brown where woody.  
 Vine shape: Round  
 Vine texture: Smooth  
 Fruit shape: Ellipsoid  
 Fruit color: Pale green ripening pale yellow  
 Fruit size: 6 x 8cm variable cm  
 Number of seeds: Few  
 Color of arils: Pale orange  
 Flavor of arils: Not tested  
 Peduncle length: N/A  
 Peduncle position: Upright  
 Bract size: Up to 1.6 x 2.5cm

*P. 'Cleary Sky'* (left), *P. 'Diva'* (right)

Flower

Bract shape: Heart-shaped  
 Bract color: Glaucous green / dull red in sun  
 Extrofloral nectaries: None  
 Description of stipules: Elongated kidney shaped often deciduous - large.  
 Vine vigor: Excellent  
 Floriferousness: Excellent  
 Light requirements: Full sun  
 Humidity requirements: Moderate

Max temp: Only tested to 30 C  
 Min temp for leaf hardiness: Only tested to minus 5 C  
 Min temp for root hardiness: Unknown  
 Additional informataion: Bloom reflexes only slightly depending on conditions and not for long, and they open for up to 3 days depending on conditions.  
 Hybrid is named for: Outstanding size of blooms for a frost hardy variety and high performance in flowering.
