

Passiflora 'Angel Rebelle'

Registration Number: 236

Registration Date: 2017-06-06

Creator of seed, Grower of original plant: Stéphane Fehr

Parentage: *Passiflora vitifolia* x *Passiflora caerulea* 'Avalanche' (Register 2003 p8) (100%)

Flower

GENERAL INFORMATION

How is it distinctive?

Red flower with dark red filaments. Stipules pale red, wing-shaped. Bracts up to 2/3 size of flowers, dentate with red veins

Why this name?

In gratitude to Angélique Stéphany (aka Angel Rebelle), secretary of Les Amis de la Passiflore, for looking after the plant. The red stipules recall the wings of angels.

Has application been made for patent or PBR, or has the plant had another name? No
Has it been published? No

Where grown

In a heated greenhouse in the Haut-Rhin, Alsace. USDA Zone 7

Propagation information

3 clones exist. Propagation by cuttings is difficult; layering preferred

Culture requirements

Flowers generally open on sunny days. Part-shade and regular misting recommended
